Assignment Instructions

1. Open Jupyter Notebook:

   - Launch your preferred Jupyter Notebook environment. This could be through Anaconda Navigator, command line, or any other method you prefer.

2. Determine the Type of Answer Required:

   - If the question requires a theoretical explanation, proceed to write the answer in Markdown format by adding a new cell below the question.
   - If the question requires coding, write the code in a code cell and execute the cell to obtain the output.

3. Writing Theoretical Answers:

   - Click on the "+" button in the toolbar to add a new cell.
   - Select the cell type as "Markdown" from the dropdown menu in the toolbar.
   - Write your theoretical answer in Markdown format within the cell.
   - Execute the cell to render the Markdown text properly.

4. Writing and Running Code:

   - Click on the "+" button in the toolbar to add a new cell.
   - Select the cell type as "Code" from the dropdown menu in the toolbar.
   - Write your code within the cell.
   - Execute the cell to run the code and obtain the output.

5. Upload Assignment on GitHub:

   - Once you have completed the assignment, save your Jupyter Notebook.
   - Create a new repository (Repository name " VIQASYS PYTHON INTERSHIP)on GitHub to upload your assignment. Upload your Jupyter Notebook file to the repository.

6. Submit Assignment Link:

   - Access the provided Google Form. (https://forms.gle/2aSqsjUHYRkAnv1MA)
   - Fill in the necessary details.
   - Paste the link to your assignment repository (GitHub link) in the designated field.

7. Double-Check:

   - Before submitting, ensure that all questions have been answered correctly.
   - Verify that your Jupyter Notebook is properly saved and uploaded to GitHub.
